To whom it may concern,

It is my pleasure to recommend Sidiq Daniel, who served as an Assistant Software Developer on *Industry Exams +*. During his time on the project, Sidiq took on critical responsibilities in backend development, including designing and maintaining network infrastructure, implementing network hardening measures, setting up secure web servers, and managing cloud infrastructure. His cybersecurity initiatives were instrumental in safeguarding the platform and ensuring reliable performance for users.

Sidiq consistently demonstrated strong technical skills and a collaborative mindset. He worked closely with me on code reviews, research, and problem-solving, contributing valuable insights and innovative solutions. His attention to detail and commitment to quality assurance improved the platform's performance and security, showcasing his ability to deliver high-quality results under tight deadlines.

Beyond his technical expertise, Sidiq's clear communication and professionalism fostered effective collaboration. I have no doubt that Sidiq Daniel will excel in any organization he joins. Please feel free to contact me at (516)402-1345 or Eburke@industryexamsplus.com for additional information.

Best Regards,
Elijah Burke
